

Registrant Panel Discussion
in
2014 MRL Harmonization
Workshop
June 18-19, 2014

Jamin Huang
Bayer CropScience

US Grower MRL Priority Database Current (V.1)

- A transparent forum for partnership among growers, government and registrants, including IR-4 and BCI
 - Growers select chemical/commodity priorities and provide justification
 - Registrants to provide comments to priorities
 - USDA FAS and EPA to compile US Priority List(s) when opportunity arises in partner countries
 - Registrants to submit data for import MRLs

US Grower MRL Priority Database V.2

- To further enhance this partnership by
 - including registrants to select chemical/ commodity priorities, and growers to provide comments
- To make it a genuine two-way partnership between growers and registrants
 - allow MRL priorities to include both perspectives

US Priority Lists V.2

- Joint priority lists
 - (US + country X) to (country A)
 - (US) to (countries A and B), particularly if A and B have ag commodity trade
 - (US + country X) to (countries A and B)
- To synergize the effort and maximize outcome
- Not a new idea. Brought up by Ms. Rossi, and touched on in the MRL Strategy working group meetings. Deserve additional thoughts.
