## Products w low public health concern

- **Biopesticides, are playing a more important role in plant protection**
- **Concern that they are not be viewed as “safe” if not included as part of the Codex standards**
- **Growers may be reluctant to incorporate these important tools in to their farming practices.**
- **Include: some mineral substances of natural origin, pesticides of biological origin, including bacteria, algae, protozoa, viruses and fungi, natural substances such as pheromones or other semiochemicals, and botanical extracts.**
- **CCPR noted that the work should aim at setting criteria rather than the development of lists**

## Hop Data Requirements

- Ever changing..
- US – 3 field trials, one decline
- EU – 4 field trials, then 8 and now back to 4...2 declines
- Canada – 1, then 2 and if a US/CAN study 5....(CFT release July 11, 2017)
