Classification: Public

MRL Considerations

Past	Present	Future
Providing tools for growers	Ensuring freedom to export; understand trade	Customized use plans and analytical support
Conduct studies for national registration purposes	Conduct studies to provide product information to growers and import registrations	International registration requirements applicable in all nationals; international joint reviews
Not engaged in Codex	Actively plan Codex submissions in initial product development stages	More Pilot Projects leading to simultaneous registrations and harmonized MRLs
Focus on food & feed chemical products	Expanding demand for fuel and biotech	Synchronized chemical & biotech approvals
Conduct residue studies at highest use rate; highest MRL	Conduct residue studies at range of use rates	Global GAPs
Establish MRLs for raw agricultural commodity	Establish MRLs for most heavily traded form of commodity	MRLs for traded commodity
Work in isolation to obtain ITs and address MRLs issues	Registrants work together with government to address foreign market registration hurdles	Holistic approach; governments, growers, importers, exporters, processors
